

Fantasia
dreaming in colour

Made in Italy

*Close your eyes.
Let your imagination run free.
What do you see?*

Designed by Italian textile designer and artist Marta Cortese, Fantasia is a new collection of indoor-outdoor prints in solution-dyed acrylic.

"The collaboration with Marta has been an inspiring journey. She has such authentic talent, incredibly fresh, imaginative and spontaneous. We spent months working together to create just the perfect ensemble of drawings, and researching the colorways that would express the soul of this collection at best. Witnessing the birth of Fantasia in her studio in Turin - pencil and watercolors in her hands, or scissors and coloured paper - made me feel like I was watching a dream come true. And this is just what we wanted this collection to feel like."

Fantasia explores a ravishing dream world where spectacular watercolors and imagination dance together, painting exotic creatures, lush jungles, romantic foliage and ballerinas.

Fantasia is manufactured and printed in Italy with a cutting-edge printing technology VivaColor. Already leading the indoor-outdoor fabrics market with their innovative Linen Look technology - which gives acrylic fabrics the sophisticated look and soft hand typical of natural textiles - the company is once again investing in revolutionary technologies to deliver nothing but Italian Excellence.

VivaColor technique prints on solution-dyed acrylic ground with premium high-pigment inks, delivering spectacular results in terms of resolution, color stability and light-fastness.

All fabrics are stain-, spill-, weather-, mould- and fade-resistant. Washable.

This collection is sustainable!
